SUMMARY

Versatile and results-driven professional with hands-on experience in web development, QA testing, e-commerce, analytics, and general operations. Skilled at problem-solving, coordinating tasks, managing projects, and ensuring smooth workflows across technical and non-technical roles. Adaptable and quick to learn, capable of handling diverse responsibilities from team supervision and customer support to troubleshooting and process improvement. Strong communication, organizational, and teamwork skills, with a focus on efficiency, reliability, and delivering quality results. Committed to contributing effectively in dynamic environments and continuously learning to expand skills across multiple fields.

PROFESSIONAL EXPERIENCE

Web Developer – E-Commerce & Data Analytics Project | WMSU TBIU

- Developed and maintained a customer-focused e-commerce and analytics website using HTML, CSS, JavaScript, PHP, and MySQL.
- Built product listing pages, shopping cart functionality, order management features, and analytics dashboards to enhance user experience and data insights.
- Designed and optimized the database structure to ensure fast, accurate retrieval of product, customer, and analytics data.
- Implemented input validation and basic security measures to protect sensitive customer and transactional information.
- Resolved technical issues, fixed bugs, and improved website performance to ensure smooth transactions and reliable analytics reporting.
- Collaborated with stakeholders to gather requirements, provide updates, and implement requested features.
- Assisted in testing checkout processes, payment integrations, and analytics reporting to ensure accurate and seamless operations.

QA Engineer / On-the-Job Trainee | BSCS Industry Visit, Manila, Luzon

- Led development and debugging of software modules using Java and C++, enhancing system stability and reducing defect rates by proactively identifying faulty logic.
- Designed and modified scripts and modules to automate repetitive tasks, improving efficiency and cutting manual effort in maintenance jobs.
- Collaborated with senior IT engineers to gather technical requirements, propose system improvements, and adapt existing architectures to new specs.
- Tested software components thoroughly, verifying correctness, performance, and compliance with security and quality benchmarks.

TOOLS & METHODOLOGIES

- Tools: Visual Studio, Git / GitHub, MySQL, SPSS, Draw.io, Microsoft Office Suite.
- Methodologies: Agile, collaborative development; continuous improvement; observant of performance/security best practices.

TECHNICAL SKILLS

- SQL / PL/SQL / Relational Databases: proficient in writing complex queries, using joins, window functions, aggregations; experience optimizing execution plans, indexing, partitioning.
- Programming Languages: Java, C++, PHP; also familiar with scripting (JavaScript).
- Web & API Development: designing and modifying scripts; exposure to RESTful service integration.
- Database Design & Data Modeling: schema design, normalization, optimizing query performance, ensuring data integrity and security.
- Software Engineering Practices: version control (e.g. GitHub), review of code quality, testing/debugging, performance benchmarking.

SOFT SKILLS

- Strong analytical & critical thinking; problem solver.
- Good communication, able to interact with teams, understand requirements, translate to technical solutions.
- Data-driven mindset and attention to quality, reliability, and efficiency.

EDUCATION

Bachelor of Science in Computer Science

Western Mindanao State University, Zamboanga City, Philippines

TVL – Electrical Installation and Maintenance

- Graduated With Honors (~90%)
- Best Research Paper
